

HEALTH, SAFETY AND ENVIRONMENT

HEALTH AND SAFETY LEADERSHIP STARTS WITH YOU

BENEFITS

Report from anywhere on your mobile device

With online and offline modes, you'll always be ready. Wirelessly report in real-time or sync when reconnected to a network.

Behaviour-based safety and accountability

Automatically manage and track corrective actions to ensure a safer worksite and build a better safety culture.

Performance tracking with worksite analytics

Get detailed insights on safety compliance and trends with customizable key performance indicators and reports.

FOCUS FS PLATFORM

Health, Safety and Environment is a module on the Focus FS software-as-a-service platform. With integrated data and functionality, you get the flexibility to build a solution that perfectly fits the needs of your organization.

Streamline processes and improve workflows

Create and customize your own forms with our powerful, user-friendly drag-and-drop tool to match your workflows.

Higher quality data for better decisions

Customize dashboards for operation overviews. Analytics at multiple levels give insights to help make better safety decisions.

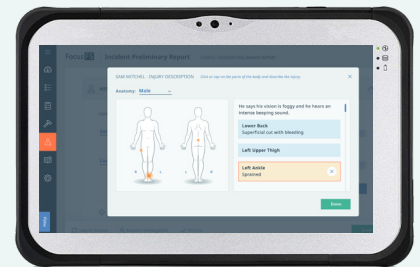

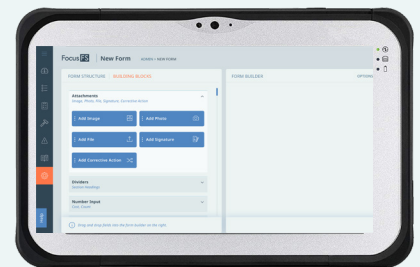

Proactively mitigate potential risks

Identify hazards, recognize trends, and take action to address safety risks and improve performance.

Safety managers are facing increasing challenges everyday. There is incredible pressure to consistently improve safety programs, identify hazards, reduce risk, and prevent workplace injuries. But keeping up to speed while relying on multiple systems or even paper forms can make it feel impossible.

Focus FS is an all-in-one safety management platform with powerful, configurable solutions. Focus FS Health, Safety and Environment gives you mobile reporting, customizable dashboards, corrective actions and more flexible tools to help proactively manage risks and improve safety outcomes.

Save time, save resources and create a safer, smarter worksite with Focus FS.
