

# TRAINING MATRIX MANAGEMENT

ENABLE A SAFER, MORE PRODUCTIVE WORKFORCE

## BENEFITS

### Easily track training activity for every employee

Improve training management with intuitive user profiles that automatically track training courses, statuses and certifications.

### Proactively manage training and certification requirements

Receive alerts when training is near an expiration date or is missing, helping ensure compliancy is maintained at every level.

### Get deeper performance insights at every level

Insightful dashboards help you to oversee training performances across teams, ensuring everyone meets current requirements.

## FOCUS FS PLATFORM

Training Matrix Management is a module on the Focus FS software-as-a-service platform. With integrated data and functionality, you get the flexibility to build a solution that perfectly fits the needs of your organization.

### Simplify certification and documentation management

Create or attach certifications and digital documents to individual user profiles, providing easy access when you need it.

### Streamline administration with user-friendly settings

Easily set up and manage a customized training system with an intuitive interface that includes drag-and-drop layout.

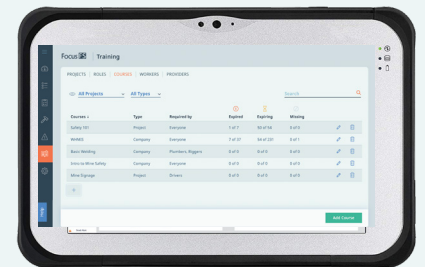

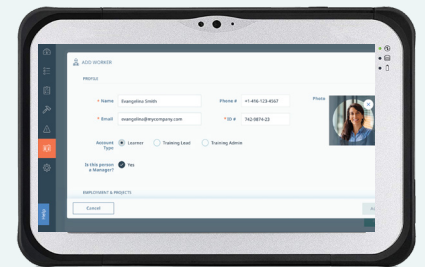

### Ensure data security remains a top priority

Go beyond basic requirements and keep all training records and data in a secure cloud-based location with restricted access.

Ensuring employees receive the required training is more difficult than it seems. With constantly changing requirements, regulations and certifications, it can be a challenge to confidently know if all personnel have what they need to safely complete their work.

With Focus FS Training Matrix Management, you can easily manage employee courses and certifications, and be automatically notified when new training is required. Documents and analytics are securely stored in one central location, improving administrative tasks while maintaining a high priority on privacy.

Save time, save resources and create a safer, smarter worksite with Focus FS.
