

EMERGENCY RESPONSE

BE PREPARED TO RESPOND TO ANY INCIDENT

BENEFITS

Quickly notify and organize emergency response teams

User-friendly interface to quickly create incident reports, notify key personnel, and allocate necessary equipment.

All your maps and emergency resources in one place

Digital maps and other documents securely stored for easy access. Collect and share notes, photos and gas readings in real time.

Conduct effective post-incident reviews and investigations

Facilitate insightful investigations with detailed incident data. Utilize strong analytics for proactive risk management.

Reduce costs associated with safety issues and incidents

Prepare your team to take action to proactively prepare and address risks to reduce fines, violations, and incidents.

Streamline asset management and security

Schedule, conduct, and share inspections on a mobile device. Scan and account for assets in real time. Automate crib check-ins/outs.

Simplify training administration and certification tracking

User-friendly system to efficiently manage individual and team training, document certifications, and maintain compliance.

Always be prepared for the unexpected

Organize your emergency response efforts and ensure your team is trained and prepared to respond to any incident.

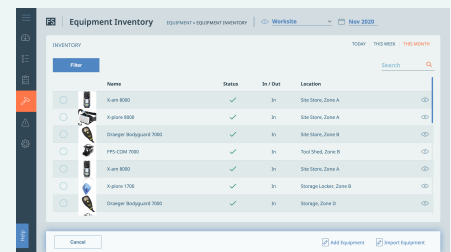

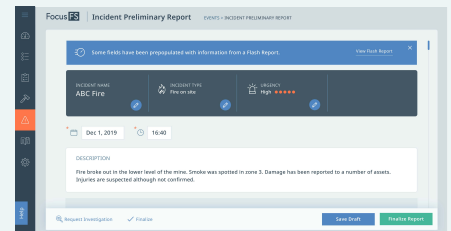

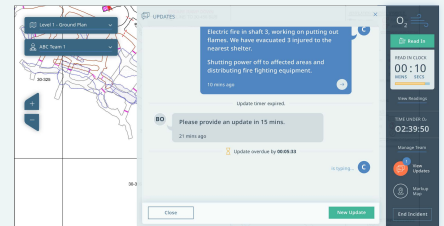

Ensure compliance and regulatory requirements are being met

Collect and analyze all the data and reports you need to share with any regulatory bodies you interact with.

Every second counts in an emergency. Quick decisions and swift actions are needed to ensure everyone returns safely.

The Focus FS Emergency Response solution allows key personnel to communicate in real time with instant alerts, interactive digital maps, and note and photo sharing. Oxygen levels and equipment checks can be easily tracked throughout a mission. Data is automatically collected and securely stored for post-incident investigations, reporting, and action management. Ensure personnel have the right training and certifications, and rescue equipment is ready for use.

Enable stronger decision-making and enhance critical responses with Focus FS.

FOCUS FS PLATFORM

Emergency Response is a solution on the Focus FS cloud-based software platform. With integrated data and functionality, you get flexible solutions that perfectly fit the needs of your organization.
