

# ASSET SAFETY

STREAMLINE ASSET MAINTENANCE AND SECURITY

## BENEFITS

### Efficiently complete inspections anywhere on-site

Schedule, conduct and share equipment inspections instantly using intuitive forms on your mobile device.

### Proactively mitigate risks and reduce incidents

Identify hazards, recognize trends, and take action to address risks and reduce fines, violations, and incidents.

### Facilitate audits with all your data in one place

Demonstrate compliance more efficiently with all the reporting you need for audits always at your fingertips.

### Increase your team's safety, productivity, and morale

Digitizing and automating your operations signals that safety is a top priority for your organization.

### Use your data to make better decisions

Focus FS gives you the tools you need to uncover insights that lead to positive impacts on safety and your bottom line.

### Better security for tools and equipment

Enhance accountability with automated tool crib check-in/out, which reduces instances of lost or damaged equipment.

### Save time and resources with asset verification

Use a scanner and tagging system to quickly scan for assets, cutting down on time spent confirming individual location.

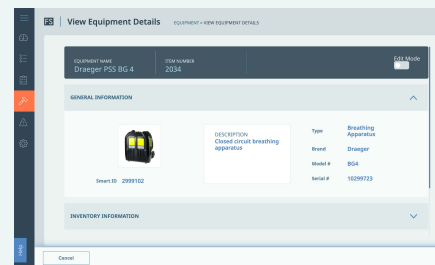

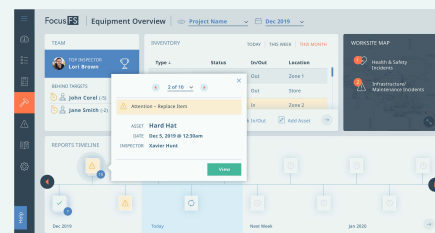

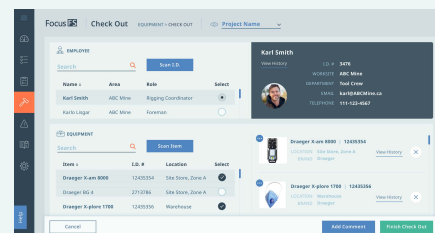

### Maximize uptime and availability for better operations

Ensure all your equipment is running at peak performance with enhanced preventative maintenance management.

Managing asset and equipment safety across worksites can often be complicated and frustrating. Completing inspections, scheduling maintenance, tracking individual items, and identifying risks is incredibly challenging if you rely on multiple systems or even paper forms.

Focus FS is an all-in-one safety management platform with powerful, configurable solutions. With Focus FS Asset Safety, you get mobile reporting, customizable dashboards, corrective actions and more flexible tools to help your organization achieve operational excellence.

Save time, save resources and create a safer, smarter worksite with Focus FS.

## FOCUS FS PLATFORM

Asset Safety is a solution on the Focus FS cloud-based software platform. With integrated data and functionality, you get flexible solutions that perfectly fit the needs of your organization.
